
PREFILLING U-MULTIRANK DATA FOR CANADA

U-Multirank is a multidimensional and inclusive ranking. To increase the coverage and therefore, the representativeness of the data, we use publicly available data sources to prefill the values for institutions. Publicly available sources will also be used to cross-reference the information retrieved from other sources. This document provides an overview of the sources found and reviewed, their use for cross-referencing and their use to prefill values for Canadian institutions included in U-Multirank and mapping choices made.

While we try to consult national experts to validate the data as much as possible, we recognise that available data and definitions can change over time and better sources emerge. Thus, we welcome your feedback in case you think that the approach used is not representative of your institution or country, or you are aware of alternative or better sources.

The key sources used for Canada are:

- **CODU**: data on students, academics, revenues
- **COU**: the official name of the institution
- The **World Bank**: exchange rate and PPP for revenue and expense data

NATIONAL OR REGIONAL SOURCES

Measurement level: Institutional level. Data aggregated at a higher level is not suitable for U-Multirank.

CODU (eng: the Common University Data Ontario (CODU)) of the Council of Ontario Universities [<https://cudo.ouac.on.ca/>] is an open data portal available to the public and provides data about Ontario's universities. U-Multirank 2022 edition collects data for years 2018-2020. For U-Multirank 2022 edition CODU data is available for 2018 and 2019 (except financial data). As indicated on CODU website (table notes), financial data on CODU platform is obtained from the COFO database and is updated annually in January/February.¹

Data obtained:

¹ CUDO. (2022). I1. University Revenue (Table notes). Retrieved from :
<https://cudo.ouac.on.ca/page.php?id=7&table=19#univ=1,2,3,4,5,8,9,11,12,14,15,16,17,21,22,23,24,25,27,28,29,30,31,32,33,34,35,42&y=2017&r=1358>

- Student data (e.g. number of students per program, new entrants and graduates, foreign students by immigration status mobility)
- Data on academic staff (e.g. academic staff employed(FTEs))
- Financial data (e.g. revenues by category, total expenditures)

COFO (eng: the the Council of Ontario Finance Officers) is an affiliate of the Council of Ontario Universities. COFO is comprised of senior finance officers from the province's 20 universities. Its activities include producing an annual financial report on sector financial details, producing the Financial Report of Ontario Universities Highlights, as well as collecting the reports submitted by COFO members.²

Data obtained:

- No data was obtained from COFO as sufficient data was available from CODU. However, in the future this source might be considered for more granular financial data.

INTERNATIONAL SOURCES

Measurement level: Institutional level except exchange rate and PPP, which is required on a country level.

(the) **World Bank** provides financial and technical assistance to developing countries. At the World Bank, the Development Data Group coordinates statistical and data work and maintains a number of macro, financial and sector databases. The World Bank's data bank contains a large array of publicly available data³, including exchange rate and PPP data.

Data obtained:

- Data on exchange rates and PPP rates to converts and compare revenue and expense data.

² Council of Ontario's Universities. (2019). Financial data (COFU). Retrieved from: <https://ontariosuniversities.ca/resources/data/cofo>
